

# SEC500 – Application Security Syllabus

<b>FIRST EVENING - Class Introduction, Overview, Perimeter Security Fundamentals</b>	
<b>Course Objectives</b>	<ol style="list-style-type: none"> <li>1. Web Application (In)Security</li> <li>2. Exploiting Information Disclosure</li> <li>3. Core Defense Mechanisms</li> <li>4. Web Application Technologies</li> <li>5. Mapping the Application</li> <li>6. Bypassing Client-Side Controls</li> <li>7. Attacking Authentication</li> <li>8. Attacking Session Management</li> <li>9. SQL Injection</li> <li>10. Attacking other Users</li> </ol>
<b>Student Introductions</b>	<ol style="list-style-type: none"> <li>1) Experience with Information Security</li> <li>2) Background and expectations</li> </ol>
<b>Course Materials</b>	<ol style="list-style-type: none"> <li>1) Web Application Hacker's Handbook – Second Edition - Wiley</li> </ol>
<b>Class Process</b>	<ol style="list-style-type: none"> <li>1) SLU Cyber Security Certificates</li> <li>2) Instructor Introductions</li> <li>3) Student Introductions</li> <li>4) Web Application (In)Security (Chapter 1 - Slide 1)               <ol style="list-style-type: none"> <li>a. Types of Web Applications and Vulnerabilities (Slides 2-4)</li> <li>b. Web Application Security (Slide 5-8)</li> <li>c. Security Goals (Slides 9-10)</li> <li>d. The Future of Web Security (Slide 11)</li> </ol> </li> <li>5) Exercise #1</li> <li>6) Exploiting Information Disclosure (Chapter 14 – Slide 12)               <ol style="list-style-type: none"> <li>a. Exploiting Error Messages (Slide 13 -17)</li> <li>b. Gathering Published Information (Slide 18-19)</li> <li>c. Using Inference (Slide 20)</li> <li>d. Preventing Information Leakage (Slide 21)</li> </ol> </li> <li>7) Core Defense Mechanisms (Chapter 2 – Slide 22)               <ol style="list-style-type: none"> <li>a. Handling User Access (Slides 23-25)</li> <li>b. Handling User Input (Slides 26-27)</li> <li>c. Handling Attackers (Slides 28-35)</li> </ol> </li> <li>8) Exercise #2</li> <li>9) Review exercise questions and answers</li> </ol>
<b>SECOND EVENING – Web Application Technologies/Mapping the Application</b>	
<b>Class Process</b>	<ol style="list-style-type: none"> <li>1) Web Application Technologies (Chapter 3 – Slide 32)               <ol style="list-style-type: none"> <li>a. The HTTP Protocol (Slides 33-38)</li> <li>b. Web Functionality (Slides 39-41)</li> <li>c. Encoding Schemes (Slide 42)</li> </ol> </li> <li>2) Exercise #3</li> <li>3) Mapping the Application (Chapter 4 – Slide 43)               <ol style="list-style-type: none"> <li>a. Enumerating Content and Functionality (Slides 44-46)</li> <li>b. Analyzing the Application (Slides 47-52)</li> </ol> </li> <li>4) Exercise #4</li> <li>5) Review exercise questions and answers</li> </ol>
<b>THIRD EVENING – Bypassing Client-Side Controls/Attacking Authentication/Session Management, SQL Injection</b>	

<b>Class Process</b>	<ol style="list-style-type: none"> <li>1) Bypassing Client-Side Controls (Chapter 5 – Slides 53-54) <ol style="list-style-type: none"> <li>a. Transmitting Data via the Client (Slides 55-56)</li> <li>b. Capturing User Data: HTML Forms (Slide 57)</li> <li>c. Capturing User Data: Browser Extensions (Slides 58-60)</li> <li>d. Handling Client-Side Data Security (Slide 61-62)</li> </ol> </li> <li>2) Attacking Authentication (Chapter 6 – Slide 63-64) <ol style="list-style-type: none"> <li>a. Authentication Technologies (Slide 65)</li> <li>b. Design Flaws in Authentication (Slides 66-69)</li> <li>c. Implementation Flaws in Authentication (Slide 70)</li> <li>d. Security Authentication (Slide 71-74)</li> </ol> </li> <li>3) Attacking Session Management (Chapter 7 – Slides 75-76) <ol style="list-style-type: none"> <li>a. The Need for State (Slides 77-78)</li> <li>b. Weaknesses in Token Generation (Slides 79-82)</li> <li>c. Securing Session Management (Slide 83-85)</li> </ol> </li> <li>4) SQL Injection (Chapter 9 – Slide 86) <ol style="list-style-type: none"> <li>a. Injecting Code into Interpreted contexts (Slide 87)</li> <li>b. Injecting into SQL (Slide 88-95)</li> </ol> </li> <li>5) Exercise #5</li> <li>6) Review exercise questions and answers</li> </ol>
<b>FOURTH EVENING – Attacking other Users/Extra Content</b>	
<b>Class Process</b>	<ol style="list-style-type: none"> <li>1) Finish SQL Injection if required/Exercise #5)</li> <li>2) Attacking other Users (Chapter 12 – Slides 96-97) <ol style="list-style-type: none"> <li>a. Cross-Site Scripting (Slide 98)</li> <li>b. XSS Attacks (Slide 99-104)</li> <li>c. Misc Attack Items (Slide 104 – 105)</li> </ol> </li> <li>3) Exercise #6/Final</li> <li>4) Review exercise questions and answers</li> <li>5) If time permits <ol style="list-style-type: none"> <li>a. A Web Application Hacker’s toolkit (Chapter 19 – Slide 107)</li> <li>b. Attacking the Web Server (Chapter 17 – Slide 118)</li> </ol> </li> </ol>
